

COVID-19 ANNOUNCEMENT

TORQUE 

Dear customers,

Torque GT & Torque Parts are closely monitoring the UK governments advice on the recent COVID-19 outbreak and we're taking appropriate measures accordingly.

Ensuring the welfare and safety of our employees is paramount and have adjusted some of our employees working schedules whilst opting to work remotely when possible.

Torque Parts is still operating under normal circumstances and although supply interruptions are likely from certain suppliers we offer our assurance that we'll be dedicated to keeping our shelves stocked and ready for fast deliveries.

There is no delay in car preparation at present so collections from Torque GT will continue as normal until we're informed otherwise. However, 1-2-1 interaction will be in line with current guidelines.

We're still actively locating cars in Japan for our Personal Import customers as well as stocking our own showroom so rest assured this side of the business is currently operating as usual.

We sincerely wish you and your families the best of luck through the coming weeks and hope few are affected by this. By supporting the more vulnerable in these difficult times we're far more likely to emerge the other side stronger and more considerate of others.

Please don't hesitate to contact us should you have any questions or concerns.

The Torque GT / Parts Team
